## **ABOUT MYSELF**

**Being a student of science during my senior secondary school days and then going on to complete M.A English and subsequently pursuing to do M.A and MPhil in Linguistics have given me a rare opportunity to be truly inter-disciplinary. My interest to learn new and varied subjects is ever increasing and that is precisely the reason that I am, now, specializing in Computational Linguistics. Learning has never been so exciting before I took up this area. It has helped me to understand related aspects of Linguistics and computer science and their applications that can be important to the Indian society.**

**Nothing is more exciting and satisfying than to learn and share knowledge with young minds and that is precisely the reason I took teaching as my first profession.**

**Stamp of the Director, Cluster Innovation Centre**
