

Project 4: The Problem of Sanitation and Hygiene in Azadpur Vegetable Mandi: Looking for Solutions

Students' Team: Abhishek Jaiswal, Dhananjay Kumar, Niket Sagar, Shreesh Mishra, Vikas Rathore

Internal Mentor: Dr. Vikas Kumar Verma

External Mentor: Dr. Chandrashekhar (Ex. Resident, G.P. Pant Hospital)

Brief Description: This project aims to understand the sanitary and hygiene conditions at the Azadpur Vegetable Market and provide alternate solutions to improve the situation. The study would focus on a survey of the hygiene and sanitation conditions in the Mandi and compare them with standard parameters. The method adopted will include interviewing the labourers, porters, shop owners and others at the Mandi to collect information about the impact of the existing sanitary and hygienic conditions in our study area. This will also involve an interaction with doctors of the hospitals/health centres in the surrounding areas to find out about the types of health problems faced by people residing in, and the adjoining areas of, the Mandi.
