

Project 7: Water Crisis at Kusumpur Pahari: Looking for Resolutions

Students' Team: Adarsh Kumar, Arun Kumar, Praveen Kumar, Shamrez Ali, Subhash Jha

Internal Mentor: Mr. M. Saleem Mir

External Mentor: Dr. Ashis Kumar Saha (Department of Geography, University of Delhi)

Brief Description: Kusumpur Pahari, the abode to the largest slum in South Delhi, is facing a severe water crisis because of the geology of the area and perhaps lack of adequate planning of distribution of water. This study attempts to bring out the ground reality of this crisis and provide possible resolutions to tackle the problem. It is opined that the changes in the water management policy in the area will help a great deal in addressing the problem. A sustainable model for waste water management will be explored to solve the problem in the long run.
