

## Historical Tourism Society - Virasat

### LET VIRASAT DO THE TALKING!!!

Cluster Innovation Centre has been a remarkable institutional set-up that lets its students interact with various industries with an aim to make social interventions at ground zero. Under the able mentorship of the faculty members the students engage in projects related to environment, health, mental health, etc. The four streams under the BA department namely, Art & Design, Counselling, Historical Tourism and Journalism broadly divide the areas of intervention of CIC's initiatives.

The recently founded Historical Tourism society, Virasat came into being in November, 2017. It was the vision of the students and faculty to let history do the talking. Already, there have been significant projects undertaken by the students under the Historical Tourism stream like Hafta Bazars, Historical Insignia: Delhi University explored, etc. which have tried to incorporate the history of unexplored aspects of the tourism market.

With Virasat, the aim is to bring all these projects under the umbrella of this society and through its newsletter and fests scheduled for the next semester, it aims to create awareness about the historical aspects of Delhi and explore the tourism market as well.

At Virasat, we don't believe in re-telling history. We believe that it already does the talking; all we do is: translate it into a language that we all can understand and reminds us of our own 'VIRASAT'.
