

# IT Innovation Lab

## Lab Objectives:

1. To apply Information and communication technologies for solving real life problems.
2. To develop solution which can be scaled to products, patents and startups in IT domain.
3. Focuses on mobile application development and web application development.

**Lab supervisor: Sachin Kumar, Assistant Professor, Cluster Innovation Centre, University of Delhi.**

**Lab introduction:** This Lab is Equipped with several Multi-Processor, Multi-Core workstations, Apple iMacs, iPads and large screen displays, the IT Innovations Lab is a perfect setup for software development, production, data mining and web hosting. The Lab has uninterrupted, load balanced Fiber DSL with a throughput of 500 Mbps, making it a perfect setup for data mining. The Server Array of Computer Center can also be accessed, which enables terabytes of data processing capability. The Cluster Innovation Centre Website and all its Subdomains are developed and hosted from the IT Innovations Lab.
