Project Name: Social Care

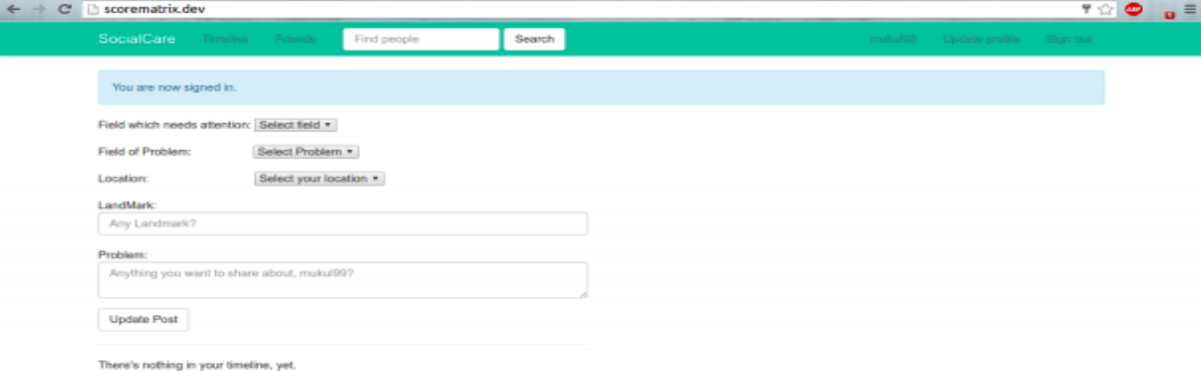

Project Supervisor: Sachin Kumar

Project Members: Utkarsh Anand, Mukul Yadav

Project Type: Semester Long

Project Status: Complete:

Project Abstract: SocialCare is a Social Networking based dynamic website application that focuses on generalizing our daily social life problems and mailing them to the concerned authority to take care of it. It's a basic social networking website which includes fundamental requirements such as login and logout sessions, panels including the timeline and profile of the user, also searching for the friends and sending & accepting the friend requests are also available. Its main functionality is to post the daily social problems you observe and that needed to raise concern about. Also, you can share it between your friends only and your friends can also comment on your posts freely to share their opinion and each post is analysed to suggest the most suitable concerned authority and mailing it to the Concerned Authority as per by the wish of the user.

The screenshot shows a web browser window with the URL 'scorematrix.dev'. The page title is 'SocialCare'. The navigation bar includes 'Home', 'About', 'Find people', and 'Search'. The main content area displays a form for posting a problem. The form includes a notification 'You are now signed in.', a dropdown menu for 'Field which needs attention:', a dropdown menu for 'Field of Problem:', a dropdown menu for 'Location:', a text input field for 'LandMark:' with the placeholder 'Any Landmark?', a text input field for 'Problem:' with the placeholder 'Anything you want to share about, mukul99?', and an 'Update Post' button. Below the form, it says 'There's nothing in your timeline, yet.'
